

## MX DS

GreenFields® MX DS is the most durable synthetic turf ever. The combination of the patented triple "W"-weaving technology (MX) and different types of diamond-shaped (DS) fibres ensures best wear resistance and tuft bind even after more than 100.000 cycles Lisport.

### MOST DURABLE TURF

The patented 3D weaving technology gives GreenFields® MX DS an extremely high tuft bind and resilience. This ensures a long-lasting performance in terms of ball roll, ball bounce, resistance and shock absorption. The various specially shaped fibres provide the surface with a natural look and feel. GreenFields® thus offers a durable playing surface with constant playing characteristics that is solid, strong, soft and 100% recyclable.

### TECHNICAL FEATURES

- Patented 3D matrix weaving technology
- Diamond-shaped fibres in three widths: small, medium and wide (ribbed)
- Unmatched tuft bind
- Yarn Dtex 108.000 per bundle varying from 360 - 400 microns
- Pile weight is 2430 gr/m<sup>2</sup>
- 100% recyclable
- Best wear resistance AND tuft bind after more than 100000 cycles LISPORT
- Certified by FIFA

### PLAYING CHARACTERISTICS

- Natural playing experience
- High resilience due to the high density, fibres and elasticity
- Natural ball roll, ball bounce, grip and traction
- Consistent playing characteristics

### GREENFIELDS YOUR FIFA PREFERRED PRODUCER

FIFA's overall objective with the FIFA Preferred Producer Initiative is to protect the interests of consumers when purchasing pitches, and to ensure that football turf systems worldwide meet FIFA's requirements with regards to quality, performance and safety.
