

MX TRIMENSION

With the combination of the patented triple W-weave technology and arched-shaped, diamond-shaped and Trilobal-shaped fibres, GreenFields offers a playing surface that is fully inspired by nature and on which players will feel 'at home' due to a natural look and feel, and a soft and natural touch.

INSPIRED BY NATURE

The patented triple W-weave technology results in an extremely high tuft bind for the GreenFields® MX TriMension system, meaning fibres are forced to stand even straighter. In combination with the unique characteristics of the Arched shaped, Diamond shaped and trilobal shaped fibres, the synthetic turf system has a long-lasting performance in terms of ball roll, ball bounce, resistance and shock absorption.

TECHNICAL FEATURES

- Combination of arched, diamond and trilobal shaped fibres
- Elastic GreenFields® MX TriMension trilobal fibres provide elastic resistance and an extended lifetime
- Enhanced tuft binding due to the triple W-weave technology
- Yarn Dtex 100.000 per bundle varying from 160 - 360 microns
- 100% recyclable
- Certified by FIFA

PLAYING CHARACTERISTICS

- Playing experience just like natural grass
- Players can kick the ball in a natural way
- High resilience due to the high density, fibres and elasticity
- Ball roll, ball bounce, grip and traction are like those on natural turf
- Authentic fibre combination for a natural look
- Constant playing characteristics

GREENFIELDS YOUR FIFA PREFERRED PRODUCER

FIFA's overall objective with the FIFA Preferred Producer Initiative is to protect the interests of consumers when purchasing pitches, and to ensure that football turf systems worldwide meet FIFA's requirements with regards to quality, performance and safety.
